Re: Discussion and feedback regarding the draft schematic design for Rodgers-Smith Park Restroom and ADA Pathway project

BACKGROUND:

Staff has received the initial draft schematic design (Exhibit 1) from landscape architect Bob Tanaka of Tanaka Design.

DISCUSSION:

The initial proposed design identifies various issues to be addressed in the design. The following is a summary of the proposed improvements:

- The accessible parking stalls will be renovated to ensure positive surface storm water surface drainage, including a new curb ramp and associated sidewalk. The curb ramp will be wide to allow for service vehicles to enter the park pathway.
- New removable or collapsible metal bollards at the base of the sloping pathway.
- Regrading and replacing the sloping pathway to conform to the maximum allowable slopes per ADA regulations.
- The removal of the existing restroom building and replacing it with a new structure. With all gender restrooms for inclusion and comfort of all park users.
- Included are optional improvement areas related to renovating the existing asphalt paving; not for ADA improvement purposes but rather to improve the conditions of the pavement surface. Option 'A' (tan colored areas) is highlighted along the ADA path of travel. Option 'B' (light blue area) covers the area at and around the group picnic area.
- Proposed finish of restroom includes Fiber Cement Board & Batten with Stone Veneer at bottom of the restroom.

At this time, it is requested that the Committee provide feedback on the schematic design including proposed restroom design and if additional scope of work should be considered as suggested by the landscape architect.
